

Montana Fish, Wildlife & Parks

September 18, 2006

Dear Reader,

Montana Fish, Wildlife and Parks have developed an addendum to the environmental assessment (EA) that was written to address the proposed Tongue River State Park Enhancement project. This addendum to the original Environmental Assessment (EA) entitled "Tongue River Reservoir Enhancement" is being written because some improvements were omitted from the original EA. This addendum will only address the omissions as nothing else has been changed for the proposed project. This addendum is not a stand alone document and should be read with the original EA

Improvements that were omitted from the original Environmental Assessment are:

Designate and improve campground campsites at Pee Wee Point. Camp pads will be developed, extended, and hardened in the existing campground. Currently visitors camp on undesignated areas in the campground. The recent drought has caused the grass to die and led to dust problems in the area. This project will add control to the campground and protect the site.

Install picnic shelters at Pee Wee Point. With the increase in visitors to the park, more picnic shelters are needed.

The project is needed to meet the public's needs, requests and or expectations.

Comments are due on or before October 18, 2006 and can be submitted to:

Montana Fish, Wildlife & Parks
Cathy Stewart: Parks Division
P.O. Box 1630
Miles City, MT 59301

Electronic comments are welcome by e-mail and can be submitted to:
